

**RightPath® Leadership Balance** engages leaders in an interactive, leadership-learning environment that shows how they can better balance their leadership for greater success and produce top results for the organization. The workshop explores key components of leadership and helps individuals understand their own leadership talents and style.

Organizations need both Results- and Relationship-oriented leaders to survive and thrive. Once leaders understand their natural tilt, they can learn to find a better balance and effectively work both sides of this leadership equation. Interactive exercises and high impact case studies are used to make this half-day session a “must” for leaders of all levels!

## Benefits

- Develops an attitude of optimism and success for leaders throughout your organization
- Assists leaders in understanding the leadership style they exhibit as well as the styles of those with whom they interact
- Builds upon the principles already learned in RightPath sessions such as *Teaming for Success*
- Reinforces what leaders are doing well and offers strategies to improve their areas of struggle
- Improves your bottom line as leaders learn to operate from both sides of the Result-Relationship balance
- Promotes balanced and effective leadership
- Adds value to your high-potential program
- Offers leaders of all levels the chance to gain skills that can be employed immediately
- Promotes cooperation and effective use of talents throughout the organization

## Audience

**RightPath Leadership Balance** is a perfect stand-alone, half-day curriculum for existing leaders or is a great follow-up after a *Teaming for Success* session. The content suits leaders and future leaders at all levels of the organization and can be offered to groups as small as 6 people or as large as 25.
