

RightPath® Teaming for Success creates a new perspective of effective teambuilding and teamwork that will directly impact efficiency and effectiveness. This helps individuals understand the talents of each team member along with the dynamics of the team as a whole. Your team will see an increase in productivity, better transparency, and improved relationships among team members as they apply new learning from this interactive workshop.

The session offers an experiential learning environment facilitated by an experienced leadership expert. Through teaching and hands-on exercises, your team will be led to build on their talents, differences, experiences and problem solving abilities. Through this workshop, the team will better understand its approach to trust, conflict and change. The team will move to a whole new level of integration and effectiveness by learning behavioral dynamics.

It all starts with the Path 4/6 Assessments, which are taken online by each participant prior to the session and it ends with a more cohesive and effective team.
